

PURELY ORGANIC LAWNCARE

Essential 1 PHE™ Plant Health Enhancement

Essential 1 PHE™ packs a one-two punch to pests and pathogens. A broad range of recognized botanical extracts and pungent essential oils suppresses pest pressure while its rich base of fermented sucrose boosts plant metabolism and phyto-defense. Stronger plants and a pest unfriendly environment add up to improved results, without dangerous and expensive synthetics.

Ingredients include: activated pepper (capsicin) and garlic extracts, plus oils of cedarwood, lemongrass, rosemary, neem, clove and citrus, all fermented in a proprietary base of complex long chain carbohydrates and sucrose. Stable for storage, and harmless to animals, trees, crops or ground-water when used as recommended. All ingredients classified exempt under EPA Sect 25b; conform to USDA National Organic Program (NOP) standards.

Application Notes: For turf or woodies, mix a half pint to a quart per gallon and apply five (5) gallons per acre, or a pint (16 oz) per thousand square feet. Always stir, shake or agitate before use. Always add product last to tank containing water. Apply during early morning or late afternoon hours.

Storage: Store in a cool, dry place, out of sunlight and not accessible to children or pets.
